

Order & Delivery Workflow

End-to-end flow from checkout through payment, Shiprocket, office pickup, and customer delivery.

Generated: 19 August 2026

1. Overview

This document describes how Uniqueworld processes orders from the moment a customer checks out until the parcel is delivered. The platform integrates Razorpay for online payments and Shiprocket for courier pickup from your office (Primary location) and delivery to the customer.

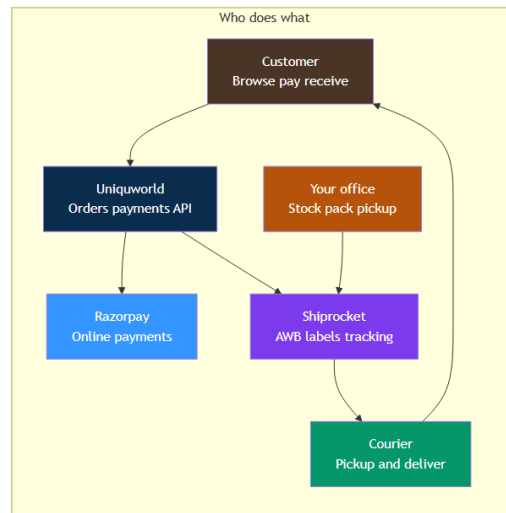

Figure 1 - Actors and responsibilities

2. End-to-end workflow (diagram)

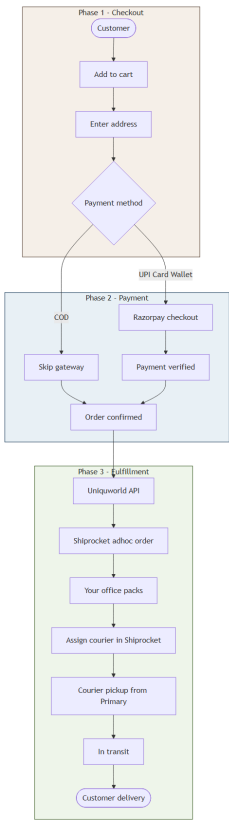

Figure 2 - Three phases: Checkout, Payment, Fulfillment

3. Sequence diagram

Detailed message flow between Customer, Uniqueworld API, Razorpay, Shiprocket, your office, and the courier.

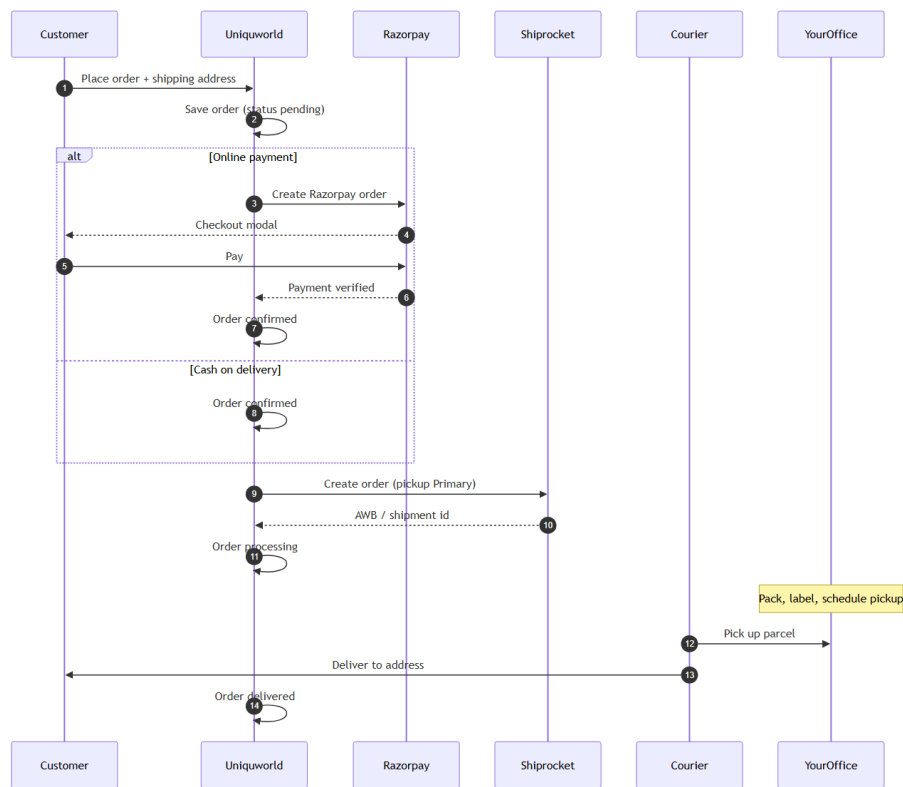

Figure 3 - Order and delivery sequence

4. Timeline

Step	When	Who	What happens	Order	Shipment
1	T+0	Customer	Adds items, address, payment choice	-	-
2	T+0	Uniqueworld	Creates order + line items	pending	-
3a	T+0-2m	Customer + Razorpay	Online payment	pending	-
3b	T+0	Uniqueworld	COD: skip gateway	confirmed	-
4	After pay	Uniqueworld	Verify payment / confirm COD	confirmed	-
5	After 4	Uniqueworld	Push to Shiprocket (pickup Primary)	processing	created
6	Same day	Your office	Pick, pack, weigh, print label	processing	-
7	Same day	Your team	Shiprocket: assign courier, schedule	processing	AWB
8	Pickup day	Courier	Collect from office	processing	picked up
9	2-7 days	Courier	In transit / out for delivery	processing	in transit
10	Delivery	Courier + Customer	Handover at address	delivered	delivered
11	After 10	Uniqueworld	Store earnings credited (if store item)	delivered	-

Typical elapsed time

Phase	Estimate
Checkout + payment	1-5 minutes
Pack + schedule pickup	Same day (your SLA)
Courier pickup to delivery	2-7 days (pincode + courier)

5. Payment paths

Online (Razorpay)

- POST /api/v1/account/orders - place order, get Razorpay order id
- Customer completes Razorpay checkout in browser
- POST /api/v1/account/orders/verify-payment - verify signature
- Server creates Shiprocket shipment automatically

Cash on delivery (COD)

- POST /api/v1/account/orders with paymentMethod: cod
- Order confirmed immediately; Shiprocket shipment in same request
- Courier collects cash on delivery
- Requires COD_ENABLED=true in server environment

6. Shiprocket pickup (your office)

Environment variable SHIPROCKET_PICKUP_LOCATION=Primary must match the Location Name in Shiprocket Settings - Pickup Locations.

App does automatically

- Creates Shiprocket adhoc order with customer address and items
- Sets COD or Prepaid based on payment method
- Stores AWB, tracking URL, Shiprocket order/shipment ids

Your team does in Shiprocket panel

- Assign courier
- Schedule pickup time
- Print shipping label
- Handle failed delivery / RTO

Order statuses

Status	Meaning
pending	Placed; awaiting online payment
confirmed	Paid or COD accepted
processing	Shipment created; fulfillment in progress
shipped	Handed to courier (optional admin update)
delivered	Received by customer
cancelled	Cancelled by customer or admin

7. Admin and environment

Delivery modes

Mode	Use when
Auto (Shiprocket)	Default - API creates Shiprocket order after payment
Manual delivery	Own staff or local courier - admin enters AWB in ERP

Environment checklist

Variable	Purpose
RAZORPAY_KEY_ID / SECRET	Online payments
COD_ENABLED	Allow cash on delivery
SHIPROCKET_ENABLED	Real shipments (false = mock in dev)
SHIPROCKET_EMAIL / PASSWORD	Shiprocket API login
SHIPROCKET_PICKUP_LOCATION	Must match pickup name in Shiprocket
SHIPROCKET_CHANNEL_ID	From Shiprocket Settings - Channels

Quick reference

Role	Responsibility
Customer	Browse, pay, receive parcel
Uniqueworld	Orders, payments, Shiprocket API, notifications
Razorpay	Payment gateway (online only)
Shiprocket	Courier network, AWB, labels, tracking
Your office	Stock, pack, schedule pickup
Courier	Pickup from office, deliver to customer
